MEMORANDUM FOR: Committee on Overhead Reconnaissance

SUBJECT: Decontrol and Downgrading of
Satellite Photography

Attached is what it is proposed to send to the United States Intelligence Board. Because of a crowded agenda, the USIB will be unable to consider this on 18 May. Please submit comments and suggestions to this office by close of business 17 May. This will permit addition of this item to our agenda if it is necessary to make any considerable changes.

MEMORANDUM FOR: United States Intelligence Board

SUBJECT: Decontrol and Downgrading of
Satellite Photography

REFERENCES: a. Memo for Holders of USIB-D-41.12/25,
1 May 1967 [redacted] 25X1
b. President's Letter of Instruction re
[redacted] 25X1
c. COMOR-D-7/44

1. On 27 April the USIB directed COMOR to propose specific guidelines for the use of intelligence derived from the exploitation of satellite photography in SECRET or TOP SECRET publications. A paper setting forth the recommended guidelines is attached as Tab A.

2. In addition to the recommended guidelines we have considered the following additional points:

a. The President's Letter of Instruction of August 26, 1960 [redacted] directs that the products of satellite reconnaissance, and information of the fact of such reconnaissance, will be given strict security handling

COMOR-D-7/44-4

within the TALENT-KEYHOLE Control System. A draft of a letter amending these instructions is attached as Tab B.

b. National Security Council Action Memo concerning U.S. policy with regard to reconnaissance satellites may require some revision, but since this is not within the purview of COMOR's responsibilities we are making no specific recommendation.

25X1A

c. The COMOR Sanitization Manual will need to be revised in the light of the procedures approved by USIB. This work will be carried out by COMOR according to normal procedure as soon as USIB has acted on Tab A. Included in the revisions will be provisions to relax the sanitization and decontrol of photography for use in targeting, illustrations, etc.

d. At its meeting on 27 April the Board agreed to the recommendation of the Acting Chairman to leave to the individual agencies the decision as to how persons not cleared for TALENT-KEYHOLE information would be informed of the continuing importance and sensitivity of

the satellite reconnaissance program. The COMOR security advisers have recommended, however, that documents including and identifying information derived from satellite reconnaissance carry the caveat in Tab C. I believe that their recommendation has merit inasmuch as the caveat would serve to supplement the instructions issued by the various agencies.

MEMORANDUM FOR: The Secretary of State
The Secretary of Defense*
The Attorney General**
The Chairman, Atomic Energy Commission
The Director of Central Intelligence

On August 26, 1960, the President directed that the products of satellite reconnaissance, and information of the fact of such reconnaissance revealed by the product, shall be given strict security handling under the provisions of a special security control system.

I confirm the importance of maintaining the TALENT-KEYHOLE Control System for the purpose of protecting the extent of our satellite reconnaissance program, the extent of its successes, its operational characteristics, and its technical details. I am modifying the instructions contained in the August 26, 1960, letter, however, to the extent of authorizing the Director of Central Intelligence to permit information derived from satellite reconnaissance to be revealed in SECRET or TOP SECRET publications with attribution to "satellite reconnaissance" and the use of sanitized photography
